Underground Service Drops:

Existing Underground Facilities Disclosure and Waiver

Property owners are responsible for locating and visibly marking all private underground facilities including, but not limited to, electrical, satellite TV, water, dog fences, telephone, septic tanks, sewer, gas, or anything else that is underground and along our underground installation path. This must be done prior to the installation of any fiber facilities by OEConnect (Otsego Electric Cooperative, Inc. (OEC)). Any property damage or damages by OEC to unmarked underground facilities will be at the property owner's expense and OEC will not be responsible for repairs.

The property owners hereby agree to hold OEConnect harmless from any and all claims, injuries, damages, expenses (including attorney fees) incurred by OEC in defending such claims or causes of action of any kind which may be filed by any party allegedly having such a claim whatsoever which may arise from the property owners' failure to locate and provide OEC with adequate advance notice of the location of such underground facilities and utilities.
