OECONNECTION

Welcome to OECONNECT's first newsletter!

Welcome to our first OEConnect newsletter! Our goal is to keep you up-to-date with things going on with our services, updates, and more!

Celebrating our 3,000th Customer

This past month, we celebrated and congratulated our 3,000th customer to the OEConnect Internet Services, Hyde Hall. Hyde Hall is a National Historic Landmark site, located eight miles north of Cooperstown, NY within the grounds of Glimmerglass State Park in Springfield, NY.

Hyde Hall is such an important piece of history in our area and a local charitable organization, it is important for their offices to remain connected to their visitors, contributors, and staff.

At OEConnect, we are excited and committed to continue to expand our broadband fiber-to-home internet service to our rural area and organizations of all kinds. Thank you to Hyde Hall and all of our customers for choosing OEConnect!

Have you heard of SmartHub?

From SmartHub you can see your services, sign up for recurring payments with autopay, update payment methods, view your usage, see billing history and even get important account notifications!

To get started, visit: **https://otsegoec.smarthub.coop/**

Residential Phone Lines

We offer residential phone lines through OEConnect for only $24.95 per month (plus tax and fees). Our regular price is $29.95, but you will receive $5 off per month for bundling with our internet!

Residential Single Line Includes:
Unlimited Local Calling
2,000 Minutes a Month Long Distance

OEConnect's Tech Tip

Our managed Wi-Fi is designed to maximize our modem (ONT) and extenders. It is built into your modem and is offered at a much more affordable cost than consumer-grade versions. Managed Wifi is only $2/month and helps us troubleshoot remotely!

Cyber Security
Tip-of-the Month
STOP-LOOK-THINK

Cyber Attacks are not new, but they are becoming more common and are something to be aware of.

When receiving an email or attachment from someone, stop before clicking. Were you expecting this from the sender? Is the sender email accurate or does it look suspicious? Just these simple steps can prevent you and your computer from being attacked!
